The energy saving filter

The new EHEIM ecco pro filter offers not only clear energy savings, but also some innovative features, which make the maintenance of your aquarium easier.

- 1 Complete with **twist-and-adjust shut-off taps**.

- 2 Quick and easy automatic self-priming via **multi-function handle** (for carrying, closing the canister and priming)

- 3 **Prefilter** at the top of the canister collects larger dirt particles and thus significantly increases the maintenance intervals before having to clean the filter material. Simple to remove and easy to clean.

- 4 Individually fillable filter baskets. Comes **complete with original EHEIM filter media**.

- 5 **High quality ceramic spindles and sleeves** guarantee extremely long service life.

- 6 **Ready to set up** (complete with filter media and accessories).
